BACKGROUND: I am a UI Developer who started off his career as a web-designer. I have a passion for various front end technologies such as HTML5, JavaScript, JavaScript frameworks. I would classify myself as a UI Developer with an eye for good design and user experience. I've had previous team lead experience. I'm also very interested in learning backend technologies.

- expert in HTML, CSS, Photoshop, ActionScript 3
- very knowledgeable in JavaScript and JQuery
- well rounded in several JavaScript frameworks (Knockout.js, Sproutcore, Ember.js)
- learning Android 4.0, C# and ASP.NET
- expert in handling other developer's code
- worked in agile development environment
- managed multiple tasks in a pressured environment while adhering to strict deadlines
- heavy focus on communication, organization and documentation
- very quick learner, creative and resourceful and highly motivated
- object oriented developing best practices and coding conventions
- have used Git and SVN
- familiar with code design pattern such as singletons, MVC, Factory, MVVM.
- intermediate understand of back-end technologies
